

READY TO STEP UP YOUR GAME AND GREEN UP YOUR COURSE?

Formulated to address one of your biggest headaches, plant chlorosis, GenNext Elementary is our solution-grade, sulfur-containing fertilizer designed to illuminate the color of your greens, fairways, and tees.

We don't like to apply Band-Aids to turf. Just adding elements isn't enough — you need soil that promotes nutrient uptake and availability. That's why we created a formula using biotechnology that corrects soil deficiencies quickly *and* over time.

WHAT YOU CAN EXPECT:

- Prolonged plant-greening response
- Corrects Iron and Manganese deficiencies
- Improves overall color and quality in plants
- Solution-grade ingredients for ease of use
- Creates drought, waterlogging, and frost tolerance
- Reduces the amount of clippings due to growth surge

INFORMATION AND APPLICATION DATA

OVERVIEW

GenNext Elementary is the answer to all of your late-night headaches. Used to supplement your current fertility program, GenNext Elementary is designed to help correct iron and manganese deficiencies to improve overall color and quality in plants.

EASE OF USE

Save time and labor when using GenNext Elementary. Our blend comes premixed in 25-pound bags to save you precious minutes each morning. Eliminate the time-consuming tank-mixing process by incorporating our ready-to-go soluble.

THE SCIENCE

Now, bear with us as we dig a little deeper. . .

GenNext Elementary is comprised of multiple nutrients, including potassium sulfate, ferrous sulfate, and manganese sulfate. The increased amounts of iron and manganese help you keep your turf green throughout the growing season, while also eliminating the inevitable growth surge. When used in a complete nutritional program, GenNext Elementary allows your turf to maintain vigor by reversing and preventing plant chlorosis.

OK, enough with all the science talk. Head over to our website and check out the real-life results at some well-known facilities and imagine what our technology could do for your course.

APPLICATION GUIDELINES

- Use GenNext Elementary at 12.5–25.0 lbs. per acre in a minimum dilution of 45 gal. of water per acre.
- **Mixing Tip** – Blend contents to be sprayed through tank strainer basket to ensure proper dilution of materials.
- **Application Tip** – For best results, use either Flat Fan or Hollow Cone spray tips and remove inline screens to prevent clogging.

DIRECTIONS FOR USE

For best results, use GenNext Elementary with GenNext A&B, C&D, or Accelerate AM, and/or as a supplement to your current fertility program. Spray on greens, fairways, and tees to correct nutrient deficiencies.
