

**ACCELERATE AM**

**BIO ACTIVATOR**

## STATEMENT OF COMPOSITION

27.00% Humic Acid derived from lignite and leonardite  
72.00% Inert Ingredients

### ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

#### PURPOSE

Use GenNext Accelerate AM to stimulate existing soil bacteria and produce increased mycorrhizal colonization ultimately enhancing nutrient uptake and water efficiency in the root zone.

#### APPLICATION INSTRUCTIONS

Accelerate AM can be applied to all crops including vegetable crops, row crops, field crops, vines, trees, ornamental lawns, gardens, landscaping, golf course greens, tees, fairways, and roughs.

#### SOIL DRENCH

Apply 1 gallon of Accelerate AM per acre.

### SPRAY TANK APPLICATION

#### SPRAY APPLICATION

Fill spray tank to half intended capacity. Begin agitation and add Accelerate AM in tank. Add any desired fertilizer products to complement Accelerate AM. Fill spray tank to intended capacity. Dilution rate should be 50 gallons per acre. It is important to irrigate thoroughly immediately after application with .25" of water.

#### SPRINKLER IRRIGATION & FERTIGATION SYSTEMS

Add enough Accelerate AM for acreage covered and fill storage tanks with water or fertilizer solution. Draw storage tanks down with 1 to 3 consecutive cycles in a 24 hour period.

**Storage Conditions:** 40° F to 95° F (4.5° to 35° C)

**MIXING TIP:** Blend contents to be sprayed through tank strainer basket to ensure proper dilution of materials.

**APPLICATION TIP:** For best results, use either Flat Fan or Hollow Cone spray tips and remove inline screens to prevent clogging. Schedule long water cycles for drip irrigation and short range sprinklers to ensure product moves into soil profile.

### FOLIAR APPLICATION

#### SPRAY APPLICATION

Apply 1/2 - 1 gallon of Accelerate AM per acre monthly as needed. Fill spray tank to half intended capacity. Begin agitation and add Accelerate AM in tank. Add any desired fertilizer or surfactant products to complement Accelerate AM. Fill spray tank to intended capacity. Dilution rate should be 50 to 100 gallons per acre. Irrigate thoroughly after application.

#### SPRINKLER IRRIGATION & FERTIGATION SYSTEMS

Apply Accelerate AM at one pint per acre and fill storage tanks with water or fertilizer solution. Irrigate with solution weekly as plant need demands.

APPLICATION RATES	DILUTION RATE
1 gal per acre initial soil drench	50 - 100 gallons per acre
1/2 - 1 gal per acre monthly foliar feed	50 - 100 gallons per acre
1 pint per acre weekly fertigation	1/2 gallon per minute minimum

**WARRANTY STATEMENT:** Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on this condition. GenNext Biotech, LLC warrants that the product conforms to the chemical description on the label and is reasonably fit for the purposes stated on such label only when used in accordance with the Application Instructions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product such as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of GenNext Biotech, LLC. GenNext Biotech, LLC will not be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer.
